I respectfully, and strongly, request the rejection of NAB's petition 04-160.

Since I am a subscriber to a satellite radio service, I feel very strongly that any limitations on available programming would infringe on my freedom of choice. I choose to subscribe to a service that gives me a superior product, or content that my local broadcasters often do not provide at all, and I feel that I should not be limited by such a petition from a group that represents the very corporations that do not provide me with this content in the first place.

Also, it is my opinion that granting such a petition would be restriction of trade and competition in this market.
